Craft With Pride.

NORTHERN TECH

Born through necessity for training throughout freezing Canadian winters, Northern Tech explored versatility & performance with a line of essentials designed to layer seamlessly, setting the foundation for comfort, utility and style. Execution of this project required materials sourcing, manufacturing management, event planning, tech packages, web + graphic design, product photography, and overall direction by Oli Bartoszek.

Special thanks to Szymon Bartoszek who flew in all the way from Poland to model, and James Waring for contributing his photographic talent and studio to making this vision a reality.
